

# Sudhanshu Mishra

Howdy, I'm Sudhanshu, a SAP security consultant, working mostly on providing solutions related to SAP authorization topics. I am also working on developing GDPR assessment sets for my current employer – Bosch. I love interacting with customers and providing solutions to their grievances through live chats, calls and mails. I also have deep interest in Machine Learning, Python and Java. Besides, I also have passion for diving deeper into the minute details of anything that can add value to the products.

## EXPERIENCE

### Robert Bosch, Coimbatore – SAP Authorization Consultant

#### *Authorization Support – SAP System*

July 2019 – Present

- Providing authorization related support via live chats, mails to customers (from Bosch Europe) for SAP authorization queries.
- Collecting requirements from customers based on their authorization needs and providing them with the SAP roles that would fulfil their needs.
- Contributing to the documentation and weekly quality analysis meetings by providing regular feedbacks on interaction of feedbacks and self.

#### *Role Development - SAP System*

August 2019 – Present

- Interacting with customers to know the requirements of their task and thus analyze the type of authorization needed.
- Creating new roles based on the requirement collected from end users.
- Modifying the already existing roles by removing/extending roles with new Tcodes to authorize or to remove authorization as per the business need of end users
- Engaging in role clean up tasks to fine balance the difference between Derived roles and Parents role in SAP.

#### *GDPR Concept Design Architect*

March 2020 – Present

- Building concept design from scratch for **GDPR** implementation in Robert Bosch, India
- Developing templates and presentations to extend our GDPR assessment services to various organizations.

#### *Central Transport Services – SAP System*

May 2020 – Present

- Interacting with European customers/colleagues to collect their authorization requirements and displaying it on Central page of Robert Bosch
- Creating Transport Requests (TRs) for customer's requirements and sending it to the concerned BASIS team to import it to the respective customer's SAP systems.
- Raising authorization requests for the customers based on their requirements once TRs reach SAP Systems.

### Acadview, Dehradun – Data Analysis Intern

May 2018 – July 2018

- Worked on Big Mart Sales Dataset.
- Performed data cleaning.
- Prepared Exploratory Data Analysis (EDA) reports
- Visualized the distribution of various features and their correlations between them.
- Applied Feature Engineering to extract the correct features for the model.
- Build regression models to predict the outlet sales.
